

VETTED LEAD GEN ASSISTANTS FOR DIRECT MAIL LEADS.

ClicksMarketer

These are 3 VA's I've personally used/vetted for generating leads for Direct Mail. They are used to collecting emails, so make sure you remind them that you want the business owner name, and business address included in their lists. Also, request that the list is scrubbed (to ensure you're getting fresh leads).

Quick tips for your direct mail campaigns.

1. Pick a niche, setup a landing page for that specific niche, and insert it on the postcard. By choosing a niche you are streamlining the process.

2. When it's time to order your leads, don't just order 100 or 250, order at least 500. That's how you save on postage too. If you mail 500+ you can get your postage down to as little as 9 cents per mailer. More helpful info on [postcard mania's website](#).
